

# KLEENSEAL KHR™ 200 SERIES

## Recessed H.I.D. Sealed Overlap Door

### FEATURES

- Aluminum housing
- Sealed construction
- Removable top plate
- Overlap door
- NSF International
- 200 PSI hosedown
- Electronic HID ballasts

### BENEFITS

- Easy installation
- Top or bottom access
- Requires less fixtures
- Corrosion resistant
- 50% longer lamp life
- Highest efficiency

### APPLICATIONS

- Food processing
- Pharmaceutical cleanrooms
- Animal containment
- Locker rooms
- Chemical plants

## Specifications/Features

### GENERAL

- Recessed sealed and gasketed.
- H.I.D. unit up to 400 watt lamps.
- Standard flange unit fits ceilings up to 3 inch thick. Optional unit fits 3 to 6 inch ceiling thickness.
- Designed for flange or 1", 1-1/2" or 2" grid mounting.
- 2" grid unit will fit most gasketed or gel systems.

### CONSTRUCTION

- Sealed and gasketed .040 aluminum housing prepainted in white acrylic enamel for added corrosion resistance.
- Seismic support mounting feature standard.
- Stainless steel housing optional.

### DOOR FRAME/ LENS

- Door is standard double thick, 20 gauge overlap painted steel.
- Overlap stainless and flush aluminum (painted or anodized) door frames are optional.
- Lens is silicone sealed to door frame.
- Door frame retained to housing when opened for safety and ease of relamping.
- Door frame secured to housing by captive stainless steel screws.
- Optional tamper resistant screws available.
- Door frame gasketed to housing with closed cell polyethylene gasket.
- Silicone gasket is optional.

*Standard double thick overlap painted steel door.*

*Electrical components accessed through bottom or top of fixture.*

- Standard lens is .200" High Temperature Acrylic. C73 glass, Drop Acrylic or Clear Polycarbonate underlay optional.
- Lens installed prisms up standard. Prisms down is optional.

### ELECTRICAL

- Ballasts are CWA or electronic and appropriate to the specified lamp and voltage.
- All electrical components can be accessed through the bottom or top of the fixture. (Consult factory for bottom access electronic.)
- All fixtures carry the IBEW Union label to insure quality.

### LISTINGS

- Listed for Wet Locations — U.S. and Canada.
- NSF International.
- Hosedown Rating 200 PSI.

## Recessed H.I.D. Sealed Inset Door

### FEATURES

- Aluminum housing
- Sealed construction
- Removable top plate
- Aluminum inset door
- High efficiency optical
- Wet location
- Electronic HID Ballasts

### BENEFITS

- Easy installation
- Top or bottom access
- Requires less fixtures
- Corrosion resistant
- Longer Lamp Life
- Highest Efficiency

### APPLICATIONS

- Cleanrooms
- Canopies
- Locker rooms
- Chemical plants
- Dirty areas
- Food Processing

## Specifications/Features

### GENERAL

- Recessed sealed and gasketed.
- H.I.D. unit up to 400 watt lamps.
- Standard flange unit fits ceilings up to 3 inches thick. Optional unit fits 3 to 6 inch ceiling thickness.
- Designed for flange or 1", 1-1/2" or 2" grid mounting.
- 2" grid unit will fit most gasketed or gel systems.

### CONSTRUCTION

- Sealed and gasketed .040 aluminum housing prepainted in white acrylic enamel for added corrosion resistance.
- Seismic support mounting feature standard.
- Stainless steel housing optional.

### DOOR FRAME/ LENS

- Inset aluminum door frame finished in prepainted white acrylic enamel for added corrosion resistance.
- Stainless steel door is optional.
- Lens is gasketed to door frame with neoprene gasket.
- Door frame retained to housing when opened for safety and ease of relamping.
- Door frame secured to housing by captive stainless steel screws.
- Optional tamper resistant screws available.
- Door frame gasketed to housing with closed cell polyethylene gasket.
- Standard lens is .200" High Temperature Acrylic. C73 glass, Drop Acrylic or Clear Polycarbonate underlay is optional.
- Lens installed prisms up standard. Prisms down is optional.

1", 1-1/2" or 2" grid mount.

Electrical components accessed through bottom or top of fixture.

### ELECTRICAL

- Ballasts are CWA or electronic and appropriate to the specified lamp and voltage.
- All electrical components can be accessed through the bottom or top of the fixture. (Consult factory for electronic bottom access.)
- All fixtures carry the IBEW Union label to insure quality.

### LISTINGS

- Listed for Wet Locations —Covered Ceilings Only.
- Listed for use in U.S. and Canada.
- NSF certified.
